

# ON A WING AND A PRAYER

## Daredevil Iraq hero wing walks at 180 mph...*on one leg!*

27 year old Rory Mackenzie, a lance corporal in the British military, was patrolling in Bazra when a roadside blast seriously injured him and killed his pal. As a result of the explosion, Rory lost his right limb.

After 8 months of rehabilitation and being fitted with a prosthesis, Rory was up and walking around.

South African born Rory says, "Tragic things don't have to defeat you." He proved that by fulfilling a dream he had and doing stomach-churning loops while fixed to the wing of a light aircraft in Gloucester, England.

Rory and fellow wing walker, Peta Todd 21, back on earth.
